SOTERIA BED BARRIERS AVAILABLE
FOR MOST MAKES/MODELS

BIRTHING BEDS

ICU & SPECIALTY BEDS
INCLUDING LOW AIR LOSS

MED / SURG BEDS

Cover works in tandem with bed so that the bed can fully function through all positions.
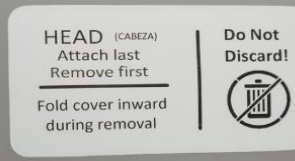

Soteria bed barrier on Stryker Secure II Bed

Unique **bar code** for each cover.

Labels identify head and foot end of barrier.

SOTERIA KEY FEATURES

Soteria is a registered trademark of Trinity Guardion - Patent Protected

Fitted Sheets work with bed barrier.

Bed barrier encapsulates mattress and bed deck.

Barrier does not interfere with bed operation features: guard rails, CPU release, mattress, stops turn assist…

IV poles accessible through barrier.

Patient fluids can not get to bed frame.
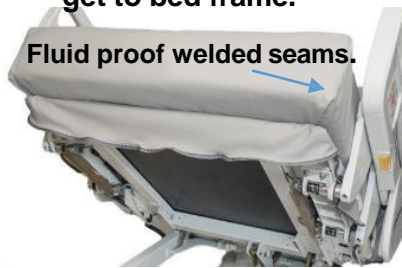

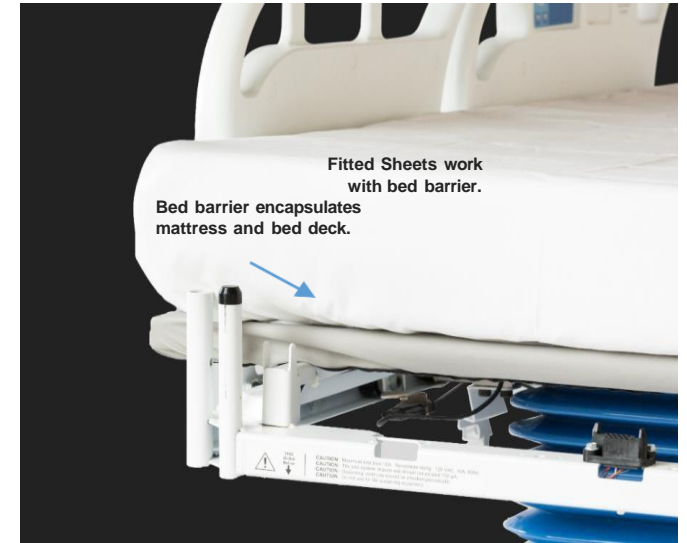

Fluid proof welded seams.
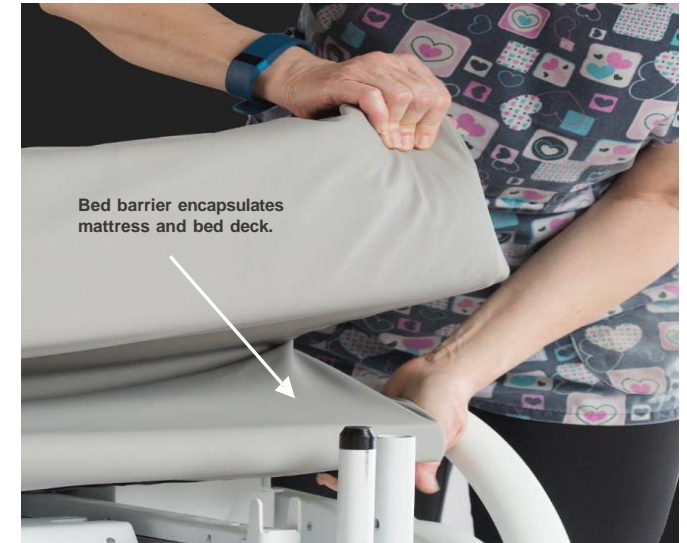

Photo showing head end of bed with bed barrier.

Label identifies where to attach to frame.

Attach Below !

White ribbon color around perimeter of cover is one means of cover type.

Bed barrier encapsulates mattress and bed deck.

Key Features

The cover works in tandem with the bed to provide full functionality in any situation.

The bed barrier encapsulates the mattress and bed deck for maximum protection.

Fluid proof welded seams and repels all fluids – protects both the mattress and the bed deck.

Key Features
Bar Code & RFI Chip

Every Soteria barrier has a Foot label with a bar code and a RFI chip embedded in it.

The Soteria EcoSystem, smart communications technology, uses these features to simplify tracking and compliance by automating device data transfer, and reporting. Automating data reporting required in healthcare facilities eliminates time-consuming labor for busy healthcare professionals.
